

While independently reviewing our records we discovered an error had been made in calculating the interest earned in accounts at several institutions for the period ending June 30, 2008. This resulted in an underreporting of interest income in FEC-351066. The interest has been correctly calculated and was reported in FEC-356713. Included with that filing was incorrect explanatory text from an earlier filing; please disregard. Further review prior to filing the Pre-Primary indicated that three individual contributions that were reported in the original 2nd quarter report which were received via slatecard.com were not listed as earmarked by slatecard. This has been corrected. This did not result in an underreporting of contributions or of disbursements.
